WORK EXPERIENCE

Coderplays Software Solutions

09/2022 - Present

PROJECTS

Global Legals

Role: Software Engineer

Languages & Technologies: JavaScript, React.js, Redux, Redux Toolkit,

Node.js, NestJS, MongoDB, Tailwind CSS, Stripe

Responsibilities:

- Collaborated with a team of 10 members to develop and deploy web applications.
- Utilized NestJS, JavaScript, React.js, Redux, Redux Toolkit, Node.js, and MongoDB for application development.
- Designed and developed user interfaces using Tailwind CSS, ensuring a clean and professional look.
- Integrated third-party APIs to enhance application functionality.
- Conducted code reviews and provided constructive feedback to

Summery

Dynamic and results-oriented Full Stack MERN Developer with extensive experience in developing and deploying robust web applications. Proficient in leveraging the MERN stack to create seamless and scalable solutions, with a strong emphasis on user authentication and security. Expertise in migrating React applications to Electron.js, ensuring cross-platform compatibility and efficient continuous deployment. Adept at working in Agile environments and collaborating effectively within teams to deliver high-quality software solutions, with competencies in React JS, Electron Js, Nest Js, Node JS, Express Js, MongoDB, SQL skill set also.

Technical-Skills

Front-end

- Javascript
- React js
- Next Js
- Typescript
- Redux and Redux Toolkit
- Bootstrap 5
- Tailwind
- Chakra UI
- MUI
- Electron Js

team members for continuous improvement.

- Implemented Stripe payment integration for secure and efficient Transactions.

Product Description:

Developed a global legal application, a software platform designed to facilitate legal processes, services, and information

dissemination across international jurisdictions. The platform

offers a range of features tailored to meet the needs of legal professionals, organizations, and individuals operating in diverse legal environments around the world.

Back-end

- Node Js
- Express JS
- MongoDB
- My SQL
- PhpmyAdmin
- Git & Github
- Firebase
- Vercel
- Netlify
- Docker
- Heroku

STAR EVENTS

Role: Full Stack Developer

Technologies: Next.js 14, Serverless Actions, Clerk, Razorpay, Stripe, Vercel, MongoDB

Responsibilities:

Frontend Development: Utilized Next.js 14 with serverless actions to build a highly performant and scalable frontend ensuring seamless user experiences and efficient handling of server-side operations.

Authentication: Integrated Clerk for robust user authentication and management, providing secure and streamlined access control for all users.

Payment Gateway Integration: Implemented Razorpay and Stripe to facilitate secure and reliable payment processing, enhancing the overall functionality and user convenience of the event management platform.

Deployment: Successfully deployed the application on Vercel, leveraging its continuous deployment, automated scaling, and optimal performance capabilities.

Database Management: Employed MongoDB for backend data storage, ensuring high availability, scalability, and efficient data

Handling.

Product Description:

A full-stack web application designed for managing and booking event tickets. The platform allows users to create, manage, and participate in various events with ease. It features a robust authentication system, secure payment gateways, and a user-friendly interface, all deployed on a scalable infrastructure.

SOCIAL EYE'S

Role: Full Stack Developer

Technologies: MERN Stack (MongoDB, Express.js, React.js, Node.js)

Responsibilities:

Platform Development: Developed a social media platform from the ground up, delivering a robust and scalable application.

Full-Stack Development: Managed both front-end and back-end development, ensuring seamless integration and efficient performance.

User Authentication & Authorization: Implemented mechanisms to enhance security and protect user data.

CRUD Operations: Built and maintained CRUD operations, facilitating smooth user interactions and data management within the application.

Product Description:

A social media platform designed to connect users and facilitate communication. The platform features robust authentication, secure data management, and a responsive interface, ensuring a secure and engaging user experience.

Cryptomarket — Web Application

Role: Frontend Developer

Technologies: React.js, Redux, Redux Toolkit Query, Coin Ranking API

Responsibilities:

Platform Development: Developed a comprehensive cryptocurrency platform from scratch, resulting in a 40% increase in user engagement within the first quarter.

Frontend Development: Built a crypto-based fintech application to promote daily use and referrals of cryptocurrencies,

enhancing user experience and engagement.

Integrated Coin Ranking API: Provided real-time cryptocurrency data, offering users accurate and up-to-date market information.

Optimized State Management: Leveraged Redux and Redux Toolkit Query to ensure efficient data handling and improved application performance.

Product Description:

A web application providing users with real-time cryptocurrency data and market insights. The platform enhances user engagement through a responsive and user-friendly design, optimized state management, and accurate data integration
